

EXPANSION UPDATE

Week of November 1, 2009

Updates

Exterior work continues on the Fitness Expansion Center site. Prep work continues for the foundation, with concrete walkways now removed from the area. Exterior work will continue this week and the amount of noticeable construction is expected to increase. For those using the cardio equipment that has been moved to the hallway we now have two televisions installed with Cardio Theater, so that you can view television in the hallway areas.

What to Expect

Next Week:

- Continued foundation prep work.
- No major shifting of equipment is foreseen in the coming week.

Near Future:

- Interior work to begin on the new office and entry area.

Impacts to Members

The relocation of equipment and reduced parking outside the facility is still the primary impact.

We do not foresee major noise or dirt issues in the coming week, but an increase in construction equipment coming in and out of the construction area is likely.

Tell Us What You Think

While we anticipate some impacts during construction, the staff at the CRC is committed to mitigating these impacts as much as possible. Let us know how we are doing, by filling out a comment card, talking to our staff, or emailing us at chris.ghione@mhcrc.com. We really feel the final project will be "worth the weight".
